

Good news from our school and our city

"Plastic in the Environment and Art" competition

In the framework of the UNESCO project Good News from our school and our city we launched the "Plastic in the Environment and Art" competition in the school year 2018/19. We tried to be friendly to the environment and we tried to promote and uplift the values of UNESCO. Among other things, we were thinking about environmental protection, collecting various waste materials (including plastics) and creating them.

17 schools (15 elementary schools and 2 secondary schools), 10 from Slovenia and 7 from abroad (two from Croatia, one from Hungary, two from Serbia and two from Ukraine) responded to the competition.

The received works were examined by the expert commission and they selected the most useful, original, imaginative, creative and aesthetic products through photographs, videos and descriptions.

Results of the competition

1st category – from 6 to 10 years old

1st PLACE

[Maska Flašnik](#)
