

UNECO PROJECT 2018-19

"Good news from our school and our town"

The project connects young explorers and creators of good news at their school. They work on the topic of sustainable development in order to promote protection of the environment. The pupils recycle plastic materials and take up different art projects. In the end, they get to present their work as an example of good practice. Their activities follow the main goals of the four pillars.

Possible participants in the project are kindergartens, primary schools and secondary schools. The project is planned to take place for 2 school years. The underlying theme will be plastic materials in our environment and art. Participants will be exploring pollution, options of recycling and they will get to reuse plastic in their art projects.

We are inviting you to enter a competition **PLASTIC IN OUR ENVIRONMENT AND PLASTIC MATERIALS AS ART 2018-19**. Participants' products, photographs and short video clips will be presented to other schools as an example of good practice at the final exhibition.

Instructions for the participants:

Invite pupils to collect plastic materials. Take a photo of it and then start to reuse it in order to make **a product with a special purpose / art product**. Write the instructions on how to make it. Take three photos during the process or make a short video clip. In the end, take a photo of three final products.

Participants should send below listed information till **15th April 2019** via mail:

- photographs of three most creative products,
- instructions on how to make three most creative products,
- three photographs of the process of making one of the products or a short video clip of the process,
- purpose of the products,
- author's name, class and mentor.

The committee will choose three finalists. The best authors will receive a special recognition award.

During the school year participants can stay in touch with their peers throughout Slovenia and foreign countries via video conference and online news. They can also apply to different competitions, take part in 3-day camp in Senovo or meet each other in Maribor, where they can participate as actors or see different plays. Their host will be the Primary school of Leon Štukelj.

In the school year 2019-20 we are planning to upgrade the project with research work, literary contributions, paintings, drawings and other art projects that will result in the final publication.
